

Welcome to Our Non-Package Custom Home Solution

THE NON-PACKAGE CUSTOM HOME SOLUTION offers a simple streamlined process to handcraft a custom home to the *exact* specifications and aspirations of the discriminating homebuyer. In essence, in the event our Custom Home Packages and available Upgrades do not complement the design and amenity objectives of the homebuyer (or the homebuyer possesses previously designed home plans for which a Custom Home Package is not well-matched), HR Johnson Homes provides a straightforward fixed fee program (based on a cost per square footage) to handcraft the custom home for the homebuyer – with abundant guidance from our Digital Resource Library to browse through hundreds of amenities and features as well as the option to select a level of Certified Green Building from the National Green Building Standard (NGBS).

IMAGINE THE BENEFITS of an improved lifestyle in which a home is designed, handcrafted, and packed with amenities to enhance the livability and functionality of the home to match the aspirations of the homeowner – and at the same time, the home provides a healthy, safe, and highly energy efficient environment with low maintenance and cleaning that contributes to reduced stress and increased cost savings. At HR Johnson Homes, we listen to our clients and our focus is “What matters is what we can do for you” to assist in imagining and fulfilling the dream of a better life through our custom home building program and long term commitment to homeowners.
